Table of Contents: Volume 250 1987

No. 1 1–240 issued on 03. 09. 1987
No. 2 241–480 issued on 02. 10. 1987
No. 3 481–710 issued on 03. 11. 1987

Al-Bader AA → Mughal S et al 349–354
Alcorn D → Messina A et al 461–464
Alm P → Lundberg L-M et al 241–249
Alpert S → Teitelman G et al 435–439
Alvarez-Uria M → Menèndez A 197–204
Ariel Gomez R, Sturgill BC, Chevalier RL, Boyd DG, Lessard JL, Owens GK, Peach MJ: Fetal expression of muscle-specific isoactins in multiple organs of the Wistar-Kyoto rat 7–12
Bär T → Miodoński AJ 465–473
Bartheld CS von, Lindörfer HW, Meyer DL: The nervus terminalis also exists in cyclostomes and birds 431–434
Bałuk P, Gabella G: Scanning electron microscopy of the muscle coat of the guinea-pig small intestine 551–561
Beaudet A → Miller MM et al 13–20
Bee J → Mardon HJ et al 157–165
Benjannet S → Marcinkiewicz M et al 205–214
Bennett G, Hugon JS, Pothier P, Ngoma Z: Effect of monensin on cell ultrastructure and glycoprotein migration in adult mouse jejunal epithelium in organ culture 355–363
Billiar RB → Miller MM et al 13–20
Björklund H → Elfvin LG et al 79–86
Björklund H → Strömberg I et al 267–275
Björkman U → Ring P et al 149–156
Björkman U → Ring P et al 701–708
Blake CA → Campbell GT et al 689–693
Bosler O → Guy J et al 657–662
Boyd DG → Ariel Gomez R et al 7–12
Britton JC → Prusch RD 589–593
Brix K → Kukulies J et al 125–134
Brooks B → Furness JB et al 607–615
Bruun A → Ekström P et al 87–92
Burridge K → Pollerberg GE et al 227–236
Calas A → Guy J et al 657–662
Cammarata PR, Oakford L, Cantu-Crouch D, Wordinger R: Attachment of blastocysts to lens capsule: A model system for trophoblast-epithelial cell interaction on a natural basement membrane 633–640
Campbell GR → Hartley L 617–626
Campbell GT, Kohn JD, Dada MO, Blake CA: An immunohistochemical study of adenohypophyseal cells containing follicle-stimulating hormone and luteinizing hormone during the phase of selective follicle-stimulating hormone release in postnatal female rats 689–693
Cantera R, Nässel DR: Postembryonic development of serotonin-immunoreactive neurons in the central nervous system of the blowfly. II. The thoracico-abdominal ganglia 449–459
Cantin M → Marcinkiewicz M et al 205–214
Cantu-Crouch D → Cammarata PR et al 633–640
Carlén B → Lundberg L-M, et al 241–249
Chang LT → Yu NW et al 585–588
Chevalier RL → Gomez RA et al 7–12
Chrétien M → Marcinkiewicz M et al 205–214
Collins PM, Pudney J, Tsang WN: Postnatal differentiation of the gametogenic and endocrine functions of the testis in the tree-shrew (*Tupaia belangeri*) 681–687
Colvee E → Garcia-Martinez V et al 595–598
Costa M → Furness JB et al 607–615
Cuschieri A → Mughal S et al 349–354
Dada MO → Campbell GT et al 689–693
Dahl D → Elfvin LG et al 79–86
Daniel PF → Lyerla TA et al 627–632
Delongeas J-L, Leheup BP, Gelly J-L, Grignon G: Anionic sites in the basement membrane of the rat epididymal epithelium during ontogenesis and after testicular and gonadal tract lesions 135–139
Dierschke DJ → Hutz RJ et al 101–104
Dijkstra CD → Rees EP van et al 695–699
Dircksen H, Zahnow CA, Gaus G, Keller R, Rao KR, Riehm JP: The ultrastructure of nerve endings containing pigment-dispersing hormone (PDH) in crustacean sinus glands: identification by an antiserum against a synthetic PDH 377–387
Dircksen H → Mangerich S et al 365–375
Dusticier G → Guy J et al 657–662
Ehinger B → Ekström P et al 87–92
Ekholm R → Ring P et al 149–156
Ekholm R → Nilsson M et al 295–303
Ekholm R → Ring P et al 701–708
Ekström P, Veen T van, Bruun A, Ehinger B: GABA-immunoreactive neurons in the photosensory pineal organ of the rainbow trout: two distinct neuronal populations 87–92
Elekes K, Hustert R, Geffard M: Serotonin-immunoreactive and dopamine-immunoreactive neurones in the terminal ganglion of the cricket, *Acheta domestica*: Light- and electron-microscopic immunocytochemistry 167–180
Elfvin LG, Björklund H, Dahl D, Seiger Å: Neurofilament-like and glial fibrillary acidic protein-like immunoreactivities in rat and guinea-pig sympathetic ganglia in situ and after perturbation 79–86
Ericson LE → Nilsson M et al 295–303
Evans PD → Myers CM 93–99
Fargher RC → McKeown BA et al 57–62
Fayet G → Nilsson M et al 295–303
Fisch JE → Jenik RA et al 315–321
Fleissner G → Heinrichs S 277–285
Fox GQ: Development of the electromotor system in *Torpedo marmorata*: Cationic staining of the electric organ 115–123
Fujita H, Ueda A, Nishida T, Otori T: Uptake of India ink particles and latex beads by corneal fibroblasts 251–255
Fujita H → Imada M et al 287–293
Furness JB, Costa M, Rökaeus Å, McDonald TJ, Brooks B: Galanin-immunoreactive neurons in the guinea-pig small intestine: their projections and relationships to other enteric neurons 607–615
Gabella G → Bałuk P 551–561
Garcia-Martinez V, Colvee E, Hurle JM: Effects of colchicine administration on the endothelial cells of the developing semilunar heart valves of the chick embryo 595–598
Gaus G → Dircksen H et al 377–387
Geffard M → Elekes K et al 167–180
Gelly J-L → Delongeas J-L et al 135–139
George SR, Meissl H: An attempt to record neuronal activity in the paraventricular organ of *Rana esculenta* by means of a direct access to the infundibular recess 53–56
Gon G, Nakamura F, Ishikawa H: Cystlike structures derived from the marginal cells of Rathke's cleft in rat pituitary grafts 29–33
Goodman SR → Pollerberg GE et al 227–236
Goodridge AG → Jenik RA et al 315–321
Gottardo G → Robba C et al 599–605
Graham EF → Schmehl MK 513–519
Grignon G → Delongeas J-L et al 135–139

Gross SK → Lyerla TA et al 627–632
Grounds MD, McGeachie JK: Reutilisation of tritiated thymidine in studies of regenerating skeletal muscle 141–148
Grounds MD, McGeachie JK: A model of myogenesis in vivo, derived from detailed autoradiographic studies of regenerating skeletal muscle, challenges the concept of quantal mitosis 563–569
Guy J, Bosler O, Dusticier G, Pelletier G, Calas A: Morphological correlates of serotonin-neuropeptide Y interactions in the rat suprachiasmatic nucleus: combined radioautographic and immunocytochemical data 657–662
Hafeez MA, Korf H-W, Oksche A: Immunocytochemical and electron-microscopic investigations of the pineal organ in adult agamid lizards, *Uromastix hardwicki* 571–578
Hansson H-A, Jennische E, Skottner A: Regenerating endothelial cells express insulin-like growth factor-I immunoreactivity after arterial injury 499–505
Hartley L, Campbell GR: Hypertrophy of radial and ulnar arteries following denervation of the chicken wing 617–626
Hasegawa H, Watanabe K, Nakamura T, Nagura H: Immunocytochemical localization of alkaline phosphatase in absorptive cells of rat small intestine after colchicine treatment 521–529
Hausman GJ → Ramsay TG et al 185–190
Hawthorn J, Nussey SS, Henderson JR, Jenkins JS: Immunohistochemical localization of oxytocin and vasopressin in the adrenal glands of rat, cow, hamster and guinea pig 1–6
Heinrichs S, Fleissner G: Neuronal components of the circadian clock in the scorpion, *Androctonus australis*: Central origin of the efferent neurosecretory elements projecting to the median eyes 277–285
Henderson JR → Hawthorn J et al 1–6
Higashi R → Toshimori K et al 673–680
Hökfelt T → Strömberg I et al 267–275
Hoy RR → Yager DD 531–541
Hsu CY → Yu NW et al 585–588
Hugon JS → Bennett G et al 355–363
Hurle JM → Garcia-Martinez V et al 595–598
Hustert R → Elekes K et al 167–180
Hutz RJ, Krueger GS, Meller PA, Sholl SA, Dierschke DJ: FSH-induced aromatase activity in hamster granulosa cells: effect of estradiol-17β in vitro 101–104
Ichikawa A → Ichikawa M 305–314
Ichikawa M, Ichikawa A: The fine structure of sublingual gland acinar cells of the Mongolian gerbil, *Meriones unguiculatus*, processed by rapid freezing followed by freeze-substitution fixation 305–314
Imada M, Tatsumi H, Fujita H: Scanning electron microscopy of vascular architecture in the gastric mucosa of the golden hamster 287–293
Ishikawa H → Gon G et al 29–33
Itoh A → Toyoshima K et al 237–239
Iversen JM, Keller PJ, Kauffman DL, Robinovitch MR: The presence of chondroitin sulfate in parotid secretory granules and saliva of the rat 221–226
Jansen HG, Sanyal S: Synaptic changes in the terminals of rod photoreceptors of albino mice after partial visual cell loss induced by brief exposure to constant light 43–52
Jenik RA, Fisch JE, Goodridge AG: Terminal differentiation in the avian uropygial gland. Accumulation of fatty acid synthase and malic enzyme in non-dividing cells 315–321
Jenkins JS → Hawthorn J et al 1–6
Jennische E → Hansson H-A et al 499–505
Jensen DR → Pan LC et al 215–220
Jensen KM → Leino RL et al 389–400
Johnson DE, Wobken JD: Calcitonin gene-related peptide immunoreactivity in airway epithelial cells of the human fetus and infant 579–583
Kauffman DL → Iversen JM et al 221–226
Keil TA: Structure of isolated sensilla and sensory neurons in vitro: Observations on developing silkmoth antennae 543–549
Keller PJ → Iversen JM et al 221–226
Keller R → Mangerich S et al 365–375
Keller R → Dircksen H et al 377–387
Kharbat B → Mughal S et al 349–354
Kohn JD → Campbell GT et al 689–693
Komuro M: Presence of glycoconjugates in prolactin granules of male rats 181–184
Korf H-W → Syed Ali S et al 425–429
Korf H-W → Hafeez MA et al 571–578
Krebs KE → Pollerberg GE et al 227–236
Krisch B, Leonhardt H Oksche A: Compartments in the organum vasculosum laminae terminalis of the rat and their delineation against the outer cerebrospinal fluid-containing space 331–347
Krueger GS → Hutz RJ et al 101–104
Ku HH → Yu NW et al 585–588
Kukulies J, Brix K, Stockem W: Studies on microplasmodia of *Physarum polycephalum*. VI. Functional analysis of a cortical and fibrillar actin system by use of fluorescent-analog cytochemistry 125–134
Layer PG → Vollmer G 481–487
Lee JK → Teitelman G et al 435–439
Leheup BP → Delongeas J-L et al 135–139
Leino RL, McCormick JH, Jensen KM: Changes in gill histology of fathead minnows and yellow perch transferred to soft water or acidified soft water with particular reference to chloride cells 389–400
Leonhardt H → Krisch B et al 331–347
Lessard JL → Ariel Gomez R et al 7–12
Lindörfer HW → Bartheld CS von et al 431–434
Lohman AHM → Thepen Th et al 649–656
Lüllmann-Rauch R: Lysosomal storage of sulfated glycosaminoglycans in renal interstitial cells of rats treated with tilorone 641–648
Lundberg L-M, Alm P Carlén B: S-100-immunoreactive nerves in the guinea-pig uterus with reference to ultrastructural correlations: Effects of chemical sympathectomy and pregnancy 241–249
Lyerla TA, Gross SK, Shea TB, Daniel PF, McCluer RH: Biochemical and morphological characterization of primary kidney cell cultures from beige mutant mice 627–632
Maina JN: The morphology of the lung of the African lungfish, *Protopterus aethiopicus*. A scanning electron-microscopic study 191–196
Malecha J → Verger-Bocquet M et al 63–71
Mangerich S, Keller R, Dircksen H, Rao KR, Riehm JP: Immunocytochemical localization of pigment-dispersing hormone (PDH) and its coexistence with FMRFamide-immunoreactive material in the eyestalks of the decapod crustaceans *Carcinus maenas* and *Orconectes limosus* 365–375
Marcinkiewicz M, Benjannet S, Seidah NG, Cantin M, Chrétien M: The pituitary polypeptide "7B2" is associated with LH/FSH and TSH cells and is localized within secretory vesicles 205–214
Mardon HJ, Bee J, Mark K von der, Owen ME: Development of osteogenic tissue in diffusion chambers from early precursor cells in bone marrow of adult rats 157–165
Mark K von der → Mardon HJ et al 157–165
Maroux S → Nilsson M et al 295–303
Martin RJ → Ramsay TG et al 185–190
Mazzocchi G → Robba C et al 599–605
McCluer RH → Lyerla TA et al 627–632
McCormick JH → Leino RL et al 389–400
McDonald TJ → Furness JB et al 607–615
McGeachie JK → Grounds MD 141–148
McGeachie JK → Grounds MD 563–569
McKeown BA, Fargher RC, Overbeeke AP van: The localization of labelled fish prolactin in various tissues of rainbow trout (*Salmo gairdneri*) 57–62

Meissl H → George SR 53–56
Melander T → Strömberg I et al 267–275
Meller K: Early structural changes in the axoplasmic cytoskeleton after axotomy studied by cryofixation 663–672
Meller PA → Hutz RJ et al 101–104
Meneghelli V → Robba C et al 599–605
Menéndez A, Alvarez-Uría M: The dorso-lateral recess of the hypothalamic ventricle in neonatal rats 197–204
Messina A, Alcorn D, Ryan GB: Intercellular spaces between macula densa cells: An ultrastructural study comparing high pressure perfusion fixation with in situ drip-fixation of rat kidney 461–464
Meyer DL → Bartheld CS von et al 431–434
Michelangeli F, Sulcas DM, Ruiz M-C: Ultrastructural studies of endocrine-like cells in the fundic gastric mucosa of the bullfrog, *Rana catesbeiana* 413–419
Miller MM, Billiar RB, Beaudet A: Ultrastructural distribution of alpha-bungarotoxin binding sites in the suprachiasmatic nucleus of the rat hypothalamus 13–20
Mimura K: Two types of very long visual fibers found in the optic lobe of the flesh-fly, *Boettcherisca peregrina* 73–78
Minnen J van → Roubos EW et al 441–448
Miodoński AJ, Bär T: The superficial vascular hyaloid system in the eye of the frogs, *Rana temporaria* and *Rana esculenta*. Scanning electron-microscopic study of vascular corrosion casts 465–473
Miyamoto K → Toyoshima K et al 237–239
Mora-Galindo J: Prokaryotic-eukaryotic cell junctions between spiral-shaped bacteria and cecal epithelium of the guinea pig 475–477
Mughal S, Al-Bader AA, Cuschieri A, Kharbat B: Ultrastructural localization of adenosine triphosphatase activity in HeLa cells at various stages of the cell cycle 349–354
Myers CM, Evans PD: An FMRFamide antiserum differentiates between populations of antigens in the brain and retrocerebral complex of the locust, *Schistocerca gregaria* 93–99
Nadakavukaren MJ → Pan LC et al 215–220
Nagura H → Hasegawa H et al 521–529
Nakamura F → Gon G et al 29–33
Nakamura T → Hasegawa H et al 521–529
Nässel DR → Cantera R 449–459
Newstead JD: Smooth muscle and myofibroblast-like cells in the perimedullary stromal basket of kidneys from ringed seals (*Phoca hispida*) 401–411
Ngoma Z → Bennett G et al 355–363
Nilsson M, Ekholm R, Fayet G, Maroux S, Ericson LE: Immunocytochemical localization of aminopeptidase N on the cell surface of isolated porcine thyroid follicles 295–303
Nishida T → Fujita H et al 251–255
Nurse CA: Localization of acetylcholinesterase in dissociated cell cultures of the carotid body of the rat 21–27
Nussdorfer GG → Robba C et al 599–605
Nussey SS → Hawthorn J et al 1–6
Oakford L → Cammarata PR et al 633–640
Ogata T, Yamasaki Y: High-resolution scanning electron-microscopic studies on the three-dimensional structure of mitochondria and sarcoplasmic reticulum in the different twitch muscle fibers of the frog 489–497
Oksche A → Krisch B et al 331–347
Oksche A → Syed Ali S et al 425–429
Oksche A → Hafeez MA et al 571–578
Olson L → Strömberg I et al 267–275
Otori T → Fujita H et al 251–255
Ōura C → Toshimori K et al 673–680
Overbeeke AP van → McKeown BA et al 57–62
Owen ME → Mardon HJ et al 157–165
Owens GK → Ariel Gomez R et al 7–12
Pan LC, Nadakavukaren MJ, Jensen DR: Effects of ingested gossypol on the ultrastructure of rat ovarian follicles 215–220
Peach MJ → Ariel Gomez R et al 7–12
Pearson KG, Robertson RM: Structure predicts synaptic function of two classes of interneurons in the thoracic ganglia of *Locusta migratoria* 105–114
Pelletier G → Guy J et al 657–662
Pino RM: Binding and endocytosis of heparin-gold conjugates by the fenestrated endothelium of the rat choriocapillaris 257–266
Pollerberg GE, Burridge K, Krebs KE, Goodman SR, Schachner M: The 180-kD component of the neural cell adhesion molecule N-CAM is involved in cell-cell contacts and cytoskeleton-membrane interactions 227–236
Pool CW → Thepen Th et al 649–656
Pothier P → Bennett G et al 355–363
Prusch RD, Britton JC: Peptide stimulation of phagocytosis in *Amoeba proteus* 589–593
Pudney J → Collins PM et al 681–687
Ramsay TG, Hausman GJ, Martin RJ: Effects of fetal versus postnatal sera upon adipose tissue stromal-vascular cells in primary culture 185–190
Rao KR → Mangerich S et al 365–375
Rao KR → Dircksen H et al 377–387
Rees EP van, Dijkstra CD, Rooijen N van: The early postnatal development of the primary immune response in rat popliteal lymph node, stimulated with thymus-independent type-1 and type-2 antigens 695–699
Riehm JP → Mangerich S et al 365–375
Riehm JP → Dircksen H et al 377–387
Ring P, Björkman U, Ekholm R: Localization of the incorporation of ^{3}H-galactose and ^{3}H-sialic acid into thyroglobulin in relation to the block of intracellular transport induced by monensin. Studies with isolated porcine thyroid follicles 149–156
Ring P, Björkman U, Ekholm R: Effect of energy deprivation on intracellular transport and secretion of thyroglobulin. Studies with isolated follicles from pig thyroids 701–708
Robba C, Mazzocchi G, Gottardo G, Meneghelli V, Nussdorfer GG: Effects of prolonged treatment with cyanoketone on the zona fasciculata of rat adrenal cortex. A combined morphometric and biochemical study 599–605
Robertson RM → Pearson KG 105–114
Robinovitch MR → Iversen JM et al 221–226
Rökaeus Å → Strömberg I et al 267–275
Rökaeus Å → Furness JB et al 607–615
Rooijen N van → Rees EP van, et al 695–699
Roubos EW, Ven AMH van de, Minnen J van: Immuno-electron microscopy of formation, degradation and exocytosis of the ovulation neurohormone in *Lymnaea stagnalis* 441–448
Ruiz M-C → Michelangeli F et al 413–419
Ryan GB → Messina A et al 461–464
Sanyal S → Jansen HG 43–52
Schachner M → Pollerberg GE et al 227–236
Schmehl MK, Graham EF: Comparative ultrastructure of the zona radiata from eggs of six species of salmonids 513–519
Seidah NG → Marcinkiewicz M et al 205–214
Seiger Å → Elfvin LG et al 79–86
Shea TB → Lyerla TA et al 627–632
Shimamura A → Toyoshima K et al 237–239
Sholl SA → Hutz RJ et al 101–104
Skottner A → Hansson H-A et al 499–505
Sluiter AA → Thepen Th et al 649–656
Stockem W → Kukulies J et al 125–134
Stoll CJ → Thepen Th et al 649–656
Strömberg I, Björklund H, Melander T, Rökaeus Å, Hökfelt T, Olson L: Galanin-immunoreactive nerves in the rat iris: alterations induced by denervations 267–275
Sturgill BC → Ariel Gomez R et al 7–12
Sulcas DM → Michelangeli F et al 413–419
Syed Ali S, Korf H-W, Oksche A: Microvasculature of the pineal organ of the rainbow trout (*Salmo gairdneri*) 425–429

Tamaki H, Yamashina S: In vivo effects of tunicamycin on the secretory processes of rat parotid glands 323–330
Tatsumi H → Imada M et al 287–293
Teitelman G, Lee JK, Alpert S: Expression of cell type-specific markers during pancreatic development in the mouse: implications for pancreatic cell lineages 435–439
Thepen Th, Voorn P, Stoll CJ, Sluiter AA, Pool CW, Lohman AHM: Mesotocin and vasotocin in the brain of the lizard *Gekko gecko*. An immunocytochemical study 649–656
Toshimori K, Higashi R, Ōura C: Filipin-sterol complexes in golden hamster sperm membranes with special reference to epididymal maturation 673–680
Toyoshima K, Miyamoto K, Itoh A, Shimamura A: Merkel-neurite complexes in the fungiform papillae of two species of monkeys 237–239
Tramu G → Verger-Bocquet M et al 63–71
Traut W → Wolf KW 421–424
Tsang WN → Collins PM et al 681–687
Ueda A → Fujita H et al 251–255
Veen T van → Ekström P et al 87–92
Ven AMH van de → Roubos EW et al 441–448
Verger-Bocquet M, Malecha J, Tramu G: Immunohistochemical localization of opioid peptides in the brain of the leech *Theromyzon tessulatum* 63–71
Vollmer G, Layer PG: Cholinesterases and cell proliferation in "nonstratified" and "stratified" cell aggregates from chicken retina and tectum 481–487
Voorn P → Thepen Th et al 649–656
Watanabe K → Hasegawa H et al 521–529
Watanabe YG: Failure of luteinizing hormone-releasing hormone (LHRH) to affect the differentiation of LH cells in the rat hypophysial primordium in serum-free culture 35–42
Wobken JD → Johnson DE 579–583
Wolf KW, Traut W: Ultrastructure of distal flagellar swellings in spermatocytes and spermatids of *Ephestia kuehniella Z.* (Pyralidae, Lepidoptera) 421–424
Wordinger R → Cammarata PR et al 633–640
Yager DD, Hoy RR: The midline metathoracic ear of the praying mantis, *Mantis religiosa* 531–541
Yamasaki Y → Ogata T 489–497
Yamashina S → Tamaki H 323–330
Yonemitsu N: Functional and structural differences between cultured outer and inner layer cells of bovine adrenal cortex 507–512
Yu NW, Ku HH, Chang LT, Hsu CY: Contrasting effects of ACTH and cyanoketone on Δ^5-3β-hydroxysteroid dehydrogenase activity in interrenal glands of tadpoles of *Rana catesbeiana* in vitro 585–588
Zahnow CA → Dircksen H et al 377–387
